

Early Exit Probing on the 10 MMEB evaluation sets: deck vs. our reproduction

Native candidate sets. Ours trained on A-OKVQA only (evaluated on its 1,145-row val split); every other set is zero-transfer, and routing thresholds were calibrated on A-OKVQA.

Deck (5-dataset training pool) Ours (A-OKVQA-only, 500 steps)

mean exit depth: deck | ours
